

LED VIDEO FLOOR

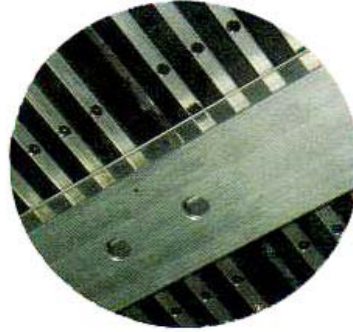

A very attractive floor lighting system consisting of LED lamps integrated into a special hard resin translucent sheet fixed on a aluminum chassis. It just performs like a regular video wall or screen, but on the floor so you can step on it, clean it, as it's waterproof, and resistant to wear and tear. It works in conjunction with a control PC so you can display videos, pictures, text etc...on that floor screen. Data and power cables are integrated into each tile, and you just need to provide the power source (110-220V) and data input to one main tile. High bright, easy to install, and long life. Ideal for TV studios, exhibitions, shows, night clubs etc...

MODEL>	EM-LF
Tile dim. (mm)	600x600 x 105
Pixels / module	32x32=1024
Pitch	18.75 mm
Configuration	1R/1G/1B
Brightness / sq.m.	1500 Nits
Total life (Hours)	70,000
Visible angle	110*V-50*H
Video quality	Good
Operating Temp. C	-15*/+50*C
Max. power / module	200 W
Weight per module	16 KG
Protection Level	IP65 (waterproof)

Full Aluminum Alloy
Thermal-dissipated Structure

Surface Structure
Integrated Signal and Power

LED VIDEO STAIRS

A very attractive stairs lighting system consisting of LED display modules (10, 8 or 6mm pitch, in any dimensions in height and width) inserted between stairs steps. It performs like a regular video wall, as it's just a normal screen in modules, and works in conjunction with a control PC so you can display videos, pictures, text etc...on the stairs. Data and power cables are integrated into each display, and you just need to provide the power source (110-220V) and data input to the first step. High bright, easy to install, and long life. Ideal for Shopping malls, high-end boutiques, TV studios, exhibitions, shows, night clubs etc...
