

# QUEUE system

**QUEUE system** is very simple yet efficient way to organise queues in customers service centers, public administrations, banks, etc... Using attractive, bright Red 4 inch (10cm) high LED digits and an adjustable "Ding-Dong" sound capable of getting everyone's attention in the room, and leading waiting customers directly to correct counter without confusion. The system consists of a Call Board(s), Call Button(s), a Control Box and a Ticket Dispenser.

## Call Board:

		L x H x W (cm)	weight (kgs)
Data cable	Single display panel	101 26 7.5	10
	Twin display panels	103 28 16	14

## Control Box & Call Button:

L x H X W (cm) = 13 x 5.5 x 6.5  
Weight 4.5 kgs

A control box connects with 16 call buttons ( 1 per counter) & sends data to the call board. One control box is needed for one or more call boards

## Ticket Dispenser:

3000 numbers roll capacity (3 x 999)  
Could be wall or pole mounted
